L8: Entry 2 of 10

File: USPT

Jul 24, 2001

DOCUMENT-IDENTIFIER: US 6266057 B1
TITLE: Information processing system

Detailed Description Paragraph Right (114):

There is a link area LISTF on the link editing sheet LES. The link list area LISTF is used to display a list of character strings indicating positions of information linked with objects. This is the same as that displayed on the link information sheet LINKS. In the link list area LISTF, the character strings stored in the argument area ARGLIST in the link information data LDATA relating to the object are displayed. In the initial state, no character string is registered in the link list area LISTF. When the user instructs the link deletion button UNLINKB after a character string is selected in the link list area LISTF, the selected character string is deleted from the link list area LISTF and the link between the information stored in the position which is indicated by the character string and the object disappears.

Current US Cross Reference Classification (5):
707/501.1

RELATION TO RELATED PATENT APPLICATIONS

The present patent application is related to the following U.S. patent application Ser. No. 09/054,362 for HYPERLINK RESOLUTION AT AND BY A SPECIAL NETWORK SERVER IN ORDER TO ENABLE DIVERSE SOPHISTICATED HYPERLINKING UPON A DIGITAL NETWORK, U.S. Pat. No. 6,006,265 issued Dec. 21, 1999. Both related applications are to inventors including the inventors of the present application. Both related applications concern servers upon a digital communications network communicating hypervideo whereas this application concerns a client upon the same network.

Both applications were initially assigned to common assignee Tata America International Corporation, and were later assigned to common assignee HOTV, Inc. The contents of the related patent application are incorporated herein by reference.
